The QVS range of CCTV products is designed to provide high quality, cost effective video surveillance for a wide range of applications.

With this in mind we bring you the new QVD-1315 Series, 550TVL Vandal Resistant Fixed Dome Camera, specifically designed for installations where the combination of high resolution images and robust construction are vital.

Able to withstand a blow from a 12lb sledgehammer, the QVD-1315 Vandal Resistant Camera is the ideal surveillance solution for monitoring areas prone to physical attack. The Cameras' 1/3", 550TVL Sony HyperHAD™ CCD and the securely encased 3.8-9.5mm Varifocal Direct Drive Lens delivers crystal clear images and excellent colour rendition even under the most hostile of conditions.

Weatherproof to IP65 the range has been designed to offer stylish looks and the Cameras' 3-Axis Mounting Mechanism enables diversity in mounting location and camera positioning, easily allowing the field of view to be adjusted to obtain the view required under the most awkward of environments ensuring satisfaction to both the installer and user every time.

Available in both Colour and true Day/Night (removable IR cut filter) Versions.

QVD-1315

Series 550TVL

Vandal Resistant

Colour Dome Camera

CAMERA FEATURES

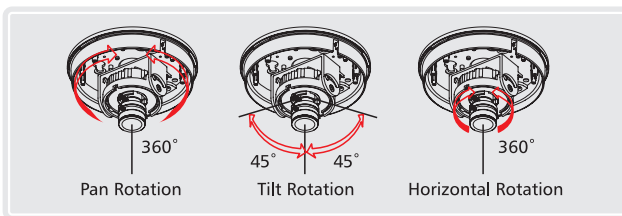

The QVD-1315 Series Dome Cameras are reliable and robust and are ideally suited for applications where the look and ambience of the camera within its surroundings is important, and where a typical camera would not survive; such as schools, car parks and correctional facilities.

EASE OF INSTALLATION AND SERVICE

The QVD-1315 Series is also fitted with a service jack output to enable technicians to adjust the field of view and perform routine maintenance without interrupting the primary image at its monitoring or recording point.

3-AXIS CAMERA ADJUSTMENT

The QVD-1315 Series has to be the easiest dome camera to install to-date. You can position the camera module easily via it's 3-Axis Camera Adjustment Mechanism and it's Varifocal lens means that there are no tools required to focus the camera.
